

On-Board Initiatives & Research

Baffin Island and Greenland 2026

Adventure Canada is committed to sustainable travel and to giving back to the communities and regions we visit.

We believe responsible travel not only protects the environment but also supports the long-term economic well-being of local areas. We're always looking for new ways to deepen our impact and do more.

Throughout each expedition season, we collaborate with organizations that share our values—supporting initiatives like welcoming Young Explorers on board, facilitating scientific research in remote regions, and contributing to charitable auctions. We encourage you to keep an eye out for these partnerships during your Adventure Canada expedition. Together, we can make a positive impact and help create a better future for all.

Auction Beneficiaries

On board, we will hold an expedition auction to support organizations dedicated to making a positive impact and supporting the communities we visit during our voyage.

Meeqqat Toqqissillutik Ornittagaat / A Safe Place for Children (Sisimiut Kids Camp)

Through our partnership with Meeqqat Toqqissillutik Ornittagaat (MTO), meaning “A Safe Place for Children,” Adventure Canada supports a community initiative dedicated to creating meaningful experiences and support for children and youth in Sisimiut, Greenland. MTO provides a safe and welcoming space where children can find connection, care, and opportunities to build confidence through positive experiences. Auction proceeds will help support MTO’s summer boat excursions, giving children the chance to explore Sisimiut Fjord with local guides, visit the abandoned settlement of Assaqaq, fish, experience Greenland’s natural environment, and create memories that may last a lifetime. These adventures provide more than a day on the water—they help foster self-worth, curiosity, and a sense of possibility for children who may have never had the opportunity to explore beyond their community.
