TUTORIAL AND BONUS TIPS

Creating The Thumbnail

Getting Started

Creating The Thumbnail- Before you can use the additional features, you must create a set of thumbnails.

Follow the directions on the next couple slides to get started.

Step 1 Enter Project Name- Type A Name You Will Want To Remember This Project By. This Will Be The Name On The Folder Where Your Thumbnails Will Live. You Will Be Able To Access These Thumbnails By Going To The Folder Name "Thumbs" On Your Desktop. Once You Click Into This Folder You Can Find All Of Your Previously Created Projects.

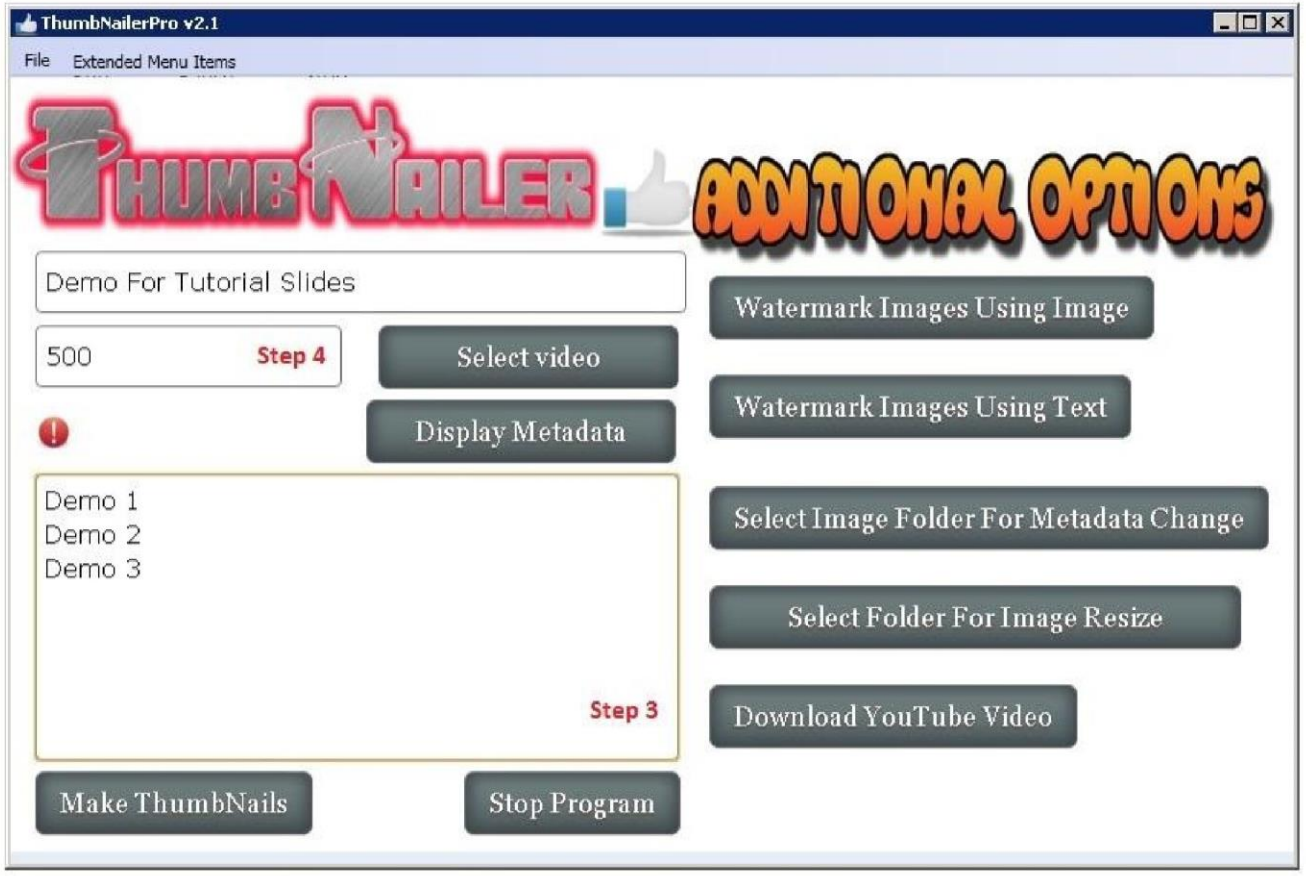
Step 2 Enter A Width- Enter A Number Would Want For Your Custom Sized Watermark Image Thumbnails. If You Want Full Size Watermarked Images, Leave This Box Blank

Step 3 Locate A Video- Before You Can Watermark Images With An Image, We Need To Create The Images (Thumbnails) That Will Be Watermarked. If You Do Not Already Have A Video On Your Computer, You Can Use The Download YouTube Video Feature To Download One From YouTube.

Step 4 Upload The Video- Click The Select Video Button, Find The Video File On Your Computer, Select It and Click Enter/Open.

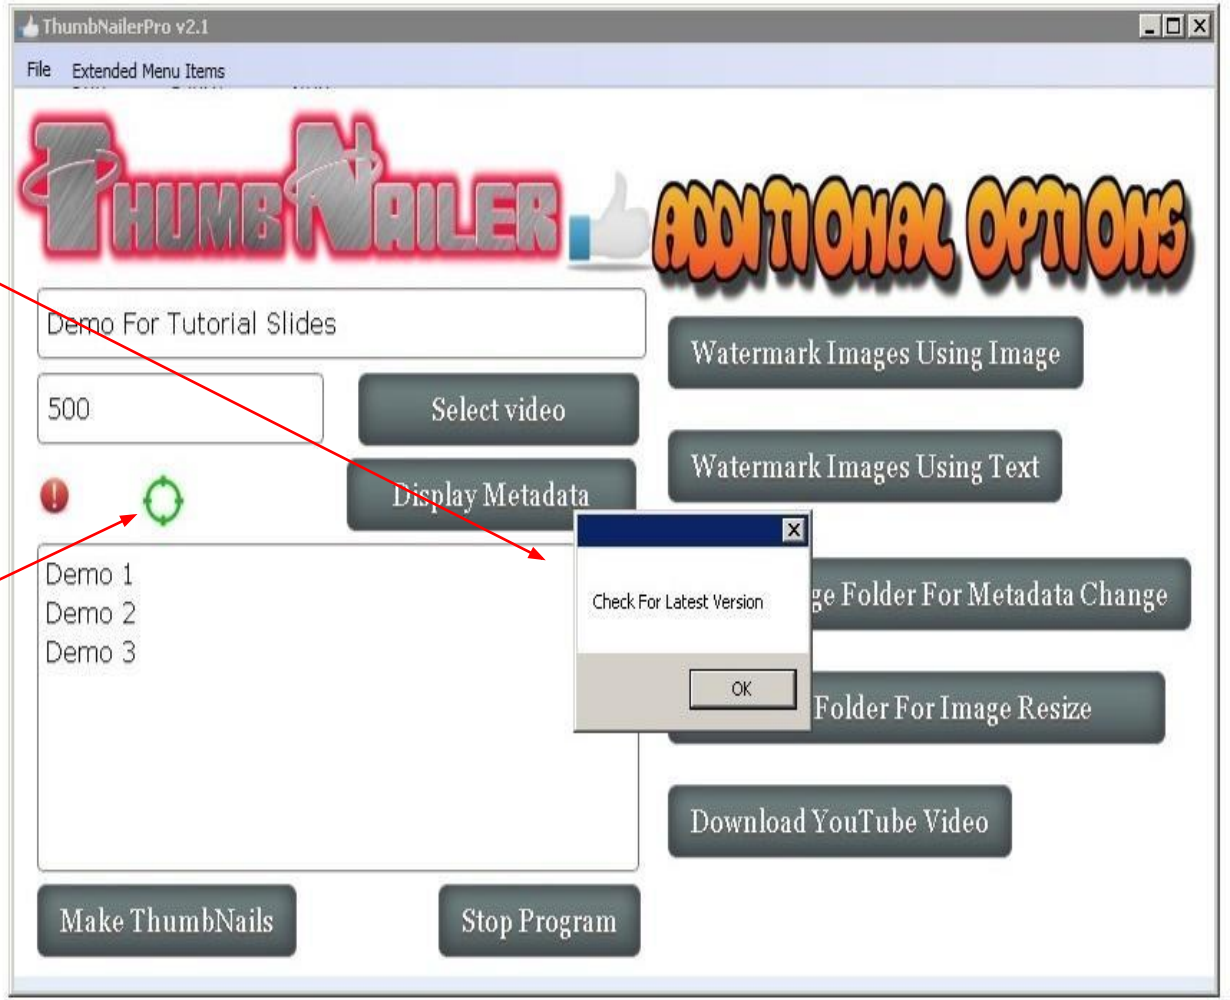
Step 5 Add Metadata Optional- If You Would Like To Add Keyword Metadata To The Images, Enter The Keywords In The Box, If You Do Not Wish To Add Metadata To The Images, Leave The Box Blank.

Step 6 Click Make Thumbnails- Once You Click This Button, ThumbnailerWill Start Generating Thumbnails And Place Them In A New Folder With Your Project Name



NOTE: The First Time You Run The Software You Will Get A Pop Up That Says Check For Latest Version.

You Will Also Notice A Green Spinning Circle And This Is A Sign The Tool Is Working. Once The Thumbnail Creation Process Is Complete, The Folders With Your Full Size And Custom Thumbnails Will Automatically Open In A New Window.



Purpose Of Feature

Watermark Images Using Image- This feature allows the user to add an image as a watermark.

The purpose of this feature is to protect the thumbnail from being stolen/reused by a competitor and to build brand awareness. It is recommend to use your company logo or some image related to your brand that your customers will always be able to remember you by.

Now let’s walk through the process.

Depending On Your Original Settings, Your Watermarked Thumbnails Will Be Located In A Folder Named Wide Or A Specific Width (i.e. 500)
Note: If You Want Full Sized Image Watermarked Thumbnails You Need To Leave The Width Box Blank BEFORE Creating The Image Watermark Thumbnails.
If You Want Custom Sized Image Watermarked Thumbnails You Need To Specify The Size BEFORE Creating The Thumbnails

Watermark Images Using Text

Step 1 Enter Project Name- Type A Name You Will Want To Remember This Project By. This Will Be The Name On The Folder Where Your Thumbnails Will Live. You Will Be Able To Access These Thumbnails By Going To The Folder Name "Thumbs" On Your Desktop. Once You Click Into This Folder You Can Find All Of Your Previously Created Projects.

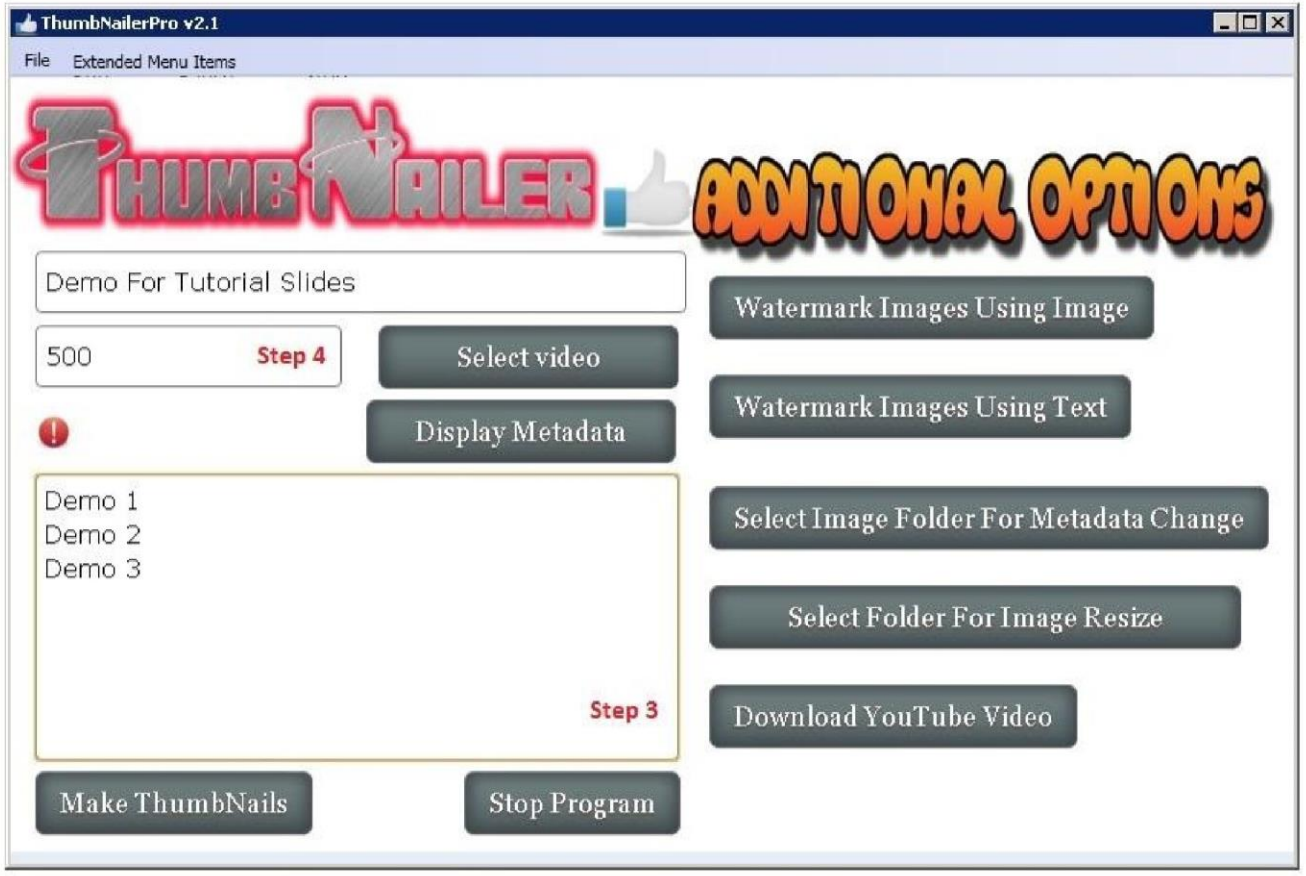
Step 2 Enter A Width- Enter A Number Would Want For Your Custom Sized Watermark Image Thumbnails. If You Want Full Size Watermarked Images, Leave This Box Blank

Step 3 Locate A Video- Before You Can Watermark Images With An Image, We Need To Create The Images (Thumbnails) That Will Be Watermarked. If You Do Not Already Have A Video On Your Computer, You Can Use The Download YouTube Video Feature To Download One From YouTube.

Step 4 Upload The Video- Click The Select Video Button, Find The Video File On Your Computer, Select It and Click Enter/Open.

Step 5 Add Metadata Optional- If You Would Like To Add Keyword Metadata To The Images, Enter The Keywords In The Box, If You Do Not Wish To Add Metadata To The Images, Leave The Box Blank.

Step 6 Click Make Thumbnails- Once You Click This Button, ThumbnailerWill Start Generating Thumbnails And Place Them In A New Folder With Your Project Name



Purpose Of Feature

Watermark Images Using Text- This feature allows the user to add text as a watermark.

The purpose of this feature is to protect the image from being stolen/reused by a competitor and to build brand awareness. It is recommend to use a company phone number or website url where customers can get in contact with you.

Now let’s walk through the process.

Select Image Folder For Metadata Change

Purpose Of Feature

Select Image Folder For Metadata Change-This feature allows the user to bulk edit the metadata for a set of Thumbnails in the selected folder.

The purpose of this feature is to wipe the existing metadata from a set of Thumbnails and replace it with whatever meta data (keywords) the user would like to enter. It is

recommend to use this feature in order to strip out any competitor data and make your thumbnails more keyword relevant to the keywords you are trying to rank for. Now let’s walk through the process.
