Agile Regulations: Ensuring Safety + Enabling Innovation

Risk Based Oversight

Ms. Alyssa Daku,
Chief Data and Risk Officer

Government
of Canada

Gouvernement
du Canada

Canada

Risk Based Oversight

Plenary Description:

In an effort to make regulation more efficient and effective, risk-based approaches are being used to shift from one-size-fit-all to a data-driven segmented approach. These case studies will explore practical examples of how this approach is being used in Canada and other jurisdictions.

Questions for Plenary

Question #1:

What messages/takeaways
resonated with you?

Questions for Plenary

Question #2:

What are some of the tools/learning that you can bring back and apply to your organization?

Differentiation by group and risk

Augmented reality

Risk prevention focus

Self-regulation

Third-Party Certification

Behavioural Science Insights

Internet of Things

AI Data Analytics

Post-Implementation Reviews

Pre-requisites Conditions

Analyse, Inform, Enforce, Build

Questions for Plenary

Question #3:

What are some of the foreseeable challenges to adopting these tools?

Thank you for Participating!
