### Multiple Monitors: Advantage Style

With the trend to multiple monitors growing due to the tremendous productivity advantages inherent in that choice. The question becomes how to marry all that productivity enhancement with an attractive, sleek and functional product solution. Look no further than the Advantage Series which provides smooth and easy monitor motion along multiples planes. Choose from a dual or quad solution that allows each monitor to be adjusted independently of the other monitors in the array. Having multiple monitors on your desk just became easier and more stylish.
