# Merlin™ Mouse
Infinitely Customizable

The very latest in "personalized mouse positioning" the Merlin Mouse makes it possible for a mouse user to micro adjust every conceivable aspect of mouse positioning which is so critical to personal comfort and safety. Given the choice, no two users prefer to use their computer mouse in the exact same position, yet existing technology has been static and has forced users to do just that. Well the Merlin Mouse makes that a thing of the past, it is now possible to adjust the following instantly and without tools: the handedness (left/right), the vertical position (above, below or level with) relative to the keyboard, the horizontal position (closer/further) relative to the keyboard and user, the fore/aft position to achieve the perfect reach condition, and angle setting to offset any keyboard mechanism angle being used and maintain perfectly level working surface. This produces an infinitely customizable mousing solution that results in the lowest-stress and lowest-risk mousing postures ever possible. "Merlin Mouse: The Power To Choose"

CornerShaper™

The CornerShaper™ is the single solution to turn vacant right angles into convenient useful workspaces. Designed in 26" (660mm), 19½" (495mm) and 12" (304 mm) widths to fit all corners, it enables easy selection to meet most applications. Allows for the mounting of all EA keyboard arms in any corner application. The unique design is expandable to fit any thickness of work surface from 1" to 2.5" perfectly flush without the need for any blocks or spacers. Makes for a clean and professional installation every time.

Custom Palm Rest Program

Our Customized Palm Rest will match your contoured keyboard with no gap for the ultimate in comfort and the cleanest look possible.

To order a customized palm rest include the following on the order:

1. add the suffix C in place of U or S and add $35 list to the U pricing
   - ie: PU20CMBR = $200 list (PU20UMBR = $165 list plus $35 list added to the U pricing this for the C model)
2. customer-supplied drawing required for new keyboards to the program
   - needs to include front contour, plus measurement from the top of the 1 and 9 keys to the front edge
