

Rapid Assist

Every Second Counts

When you've been breached, every second counts. **Traditional incident response is not enough.**

TODAY'S THREAT LANDSCAPE

ON A LONG ENOUGH TIMELINE, ATTACKERS WILL FIND AND EXPLOIT BLIND SPOTS.

Over a six-month period, the cumulative probability of an organization having at least one vulnerability within the following categories is:

TIME IS OF THE ESSENCE

Once a threat is detected, minimizing the timeline from detection to remediation and continuously monitoring for reentry is critical. However, most organizations continue to struggle as threat actors are achieving their objectives faster than ever.

ORGANIZATIONS ARE UNDERPREPARED TO IDENTIFY THREATS IN THEIR ECOSYSTEM

Every **MINUTE** costs **\$10.71**

Every **HOUR** costs **\$643**

Every **DAY** costs **\$15,433**

TRADITIONAL APPROACH

Traditional incident responders take time to deploy and begin collection of evidence for forensic investigation. This extends containment and remediation efforts without augmented capabilities to contain and monitor for threat reentry. This leads to dangerous conditions causing significant losses.

RAPID ASSIST IS THE ANSWER

Critical information that speeds forensic investigation and rapid containment capabilities will be the difference in avoiding further disruption. Introducing Rapid Assist.

35 SECONDS to triage

20 MINUTES to isolate and contain an attack

DETERMINE THE EXTENT
Rapid Assist collects critical network and endpoint data, providing on-site and remote incident response teams with crucial information that speeds forensic investigation.

DISRUPT THE THREAT
Rapid Assist minimizes threat actor dwell time with embedded containment capabilities via host isolation and network communication disruption.

ELIMINATE ALL TRACES
Rapid Assist captures full network packets and endpoint telemetry, ensuring incident responders have a comprehensive picture on how to eliminate all traces of the threat.

MONITOR FOR REENTRY
Rapid Assist monitors for threat reentry, ensuring the network and endpoints are not susceptible to new points of attack.

Modernized business demands modernized security.
