What does the eSentire and CrowdStrike partnership deliver?

CrowdStrike and eSentire recently joined forces to bring cloud-delivered Managed Detection and Response solutions to the mid-market. Leveraging CrowdStrike's endpoint protection platform and eSentire's proprietary technology stack, our collective customers gain unparalleled protection across their dynamically changing environments.

Our partnership empowers deep visibility across endpoint, network, log and cloud sources that facilitates eSentire's Security Operations Centers to detect, hunt and contain elusive threat actors on our customers behalf. eSentire's 19-year history and CrowdStrike's award-winning endpoint solutions create a partnership that delivers exceptional value and long-standing customer loyalty.

Who do we target together?

Small and medium-sized businesses with challenges across:

On-premises, hybrid and cloud threat visibility

Ineffective preventative security controls

24x7 monitoring, detection and response

Security staffing and expertise constraints

Managing security technologies

Threat hunting across disparate data sources

Incident response and threat containment

Why partner with eSentire?

99%

Customer satisfaction in ongoing operations

99%

Customer satisfaction with threat detection and response

99%

Report an overall improvement in security posture

eSentire partners with our in-house staff providing eyes on glass protection and mitigation of threat vectors.
