

Embedding Your Podcast on Your Website

Libsyn video: <https://www.youtube.com/watch?v=eZMh3GpKNpo>

Embed Directions for Individual Episode

Log in to your Libsyn Account and follow these steps:

1. Go to Content tab
2. Previously published
3. Click on link embed
4. This gives you all the information needed
5. Content will pull from show player if you have that previously embed the code on your website (cover art, colors, etc.), but you can make change if you want it to be different.
6. To add links to iTunes, Stitcher and Tunein Radio for each episode, go back to settings and enter the links for each to be added to embed code
7. Choose type of player that will show (mini, standard, custom)
8. When pasting code into your website, be sure to be in text mode (not visual)
9. Using the Libsyn code, will add share buttons if using the custom player

Note: If you have a WP site, it will automatically add a play button when you paste the link for the show on your page or post.

Embed Directions for Show Player (all episodes)

Log in to your Libsyn Account and follow these steps to embed custom player on your website:

1. Go to Destinations tab
2. Choose media player, web player or wizard player (names may vary)
3. Click edit
4. Choose custom player option
5. Choose size must be at least 450 pxl by 250 pxl, for the custom player. Other players sizes vary. You can make longer (than 250 pxl)
6. Other settings:
 - a. Thumbnail (if added artwork per episode of will default to show art work (cover art)
 - b. Autoplay on or off
 - c. Display newest to oldest or oldest to newest
 - d. Render play list (pull all shows from RSS feed or not and show)
 - e. Choose color for buttons
7. Save
8. Go back to Destinations tab
9. Look for player tab again
10. Embed code option will appear
11. Click on embed code and this will give you the code to embed on our website
