

Fenix AFH-05 Sport Headlamp Headband

User Manual

Overview

The Fenix AFH-05 is an elastic quick-dry sports headband made of air-permeable nylon fabric. The two-way SPORT fit system allows easy single-handed adjustment. The widened perforated panel adds comfort and stability while running, and the imprinted reflective FENIX logos help others see your position in low light. The headband can be detached by sliding the pulling rope out of the open grooves on either side.

Specifications

- Size: 630 x 36 mm (24.80 in x 1.42 in)
- Weight: 26 g (0.92 oz)
- Material: Air-permeable nylon

Compatible Headlamps

Fenix HL16, HL18R-T, HL32R-T, HM65R-T, HM65R-DT.

Operating Instructions

Rotate the dial **clockwise** to tighten the headband. Rotate the dial **anticlockwise** to loosen.

When the headband reaches its maximum length, keep rotating the dial in the same direction and the operation will reverse.

Installation

HL16 / HL32R-T

Attach the headband through the headlamp brackets.

HL18R-T / HM65R-T / HM65R-DT

1. Untie the AFH-05 headband:
 - Remove the pulling rope from both ends of the open groove.
 - Slide the open groove through the buckle to untie the headband.
2. Attach the AFH-05 to the headlamp:
 - Slide the buckle through the headlamp brackets.
 - Slide the open groove through the buckle.
 - Fix the pulling rope on the open groove.
