

TK11 Flashlight

The Fenix TK (Tank) series features a powerful, solid, durable, and waterproof design intended for rugged outdoor and military use. The TK11 uses 18650 Li-ion or two CR123A batteries and maintains excellent constant brightness with two output modes: General mode, which can last for a whole night and can be used for general illumination, and Turbo mode, which can be used whenever high-powered light is needed – search and rescue, long-range target identification, etc.

Features

- ◎ Cree XP-G LED (R5) with lifespan of 50,000 hours
- ◎ Two modes of output, selected by turning the bezel (Patented):
 - Turbo Mode: 285 Lumens, 2.7 hours (18650 Li-ion)
 - General Mode: Constant 60 Lumens, 14 hours (18650 Li-ion)
- ◎ Max beam length: 200 meters
- ◎ Digitally regulated output - maintains constant brightness
- ◎ Uses 18650 Li-ion or two 3V CR123A lithium batteries
- ◎ Anti-reverse protection
- ◎ 135mm (Length) x 25.4mm(Diameter) x 34mm(Head)
- ◎ 152-gram weight (excluding batteries)
- ◎ Made of durable aircraft-grade aluminum
- ◎ Premium Type III hard-anodized anti-abrasive finish
- ◎ Waterproof to IPX-8 Standard
- ◎ Toughened ultra-clear glass lens with anti-reflective coating
- ◎ Tactical tailcap switch with momentary-on function
- ◎ Anti-roll, slip-resistant body design
- ◎ Included accessories: one holster, lanyard, rubber switch boot and two spare o-rings

Note: The above-mentioned parameters are approximate and may vary between flashlights, batteries, and environments

Operation

Normal operation: Depress the pushbutton switch halfway to momentarily activate the light. Depress the push button

completely to turn on the flashlight, the light will stay on until the pushbutton is depressed to turn off.

Output Selection: Screw the head clockwise for Turbo Mode, unscrew the head for half turn for General Mode

Battery Replacement

Unscrew the tail cap to insert the batteries with the anode side (+) toward the lights head, screw the tail cap back on to test.

Usage and Maintenance

⊗ The thread of the tail is protected by a hard anodizing layer which is wear resistant, so please replace the battery by opening the tail. In order to reduce abrasion, please screw the head only when you adjust the output, abnormal abrasion will cause performance declining or even problems to the flashlight.

⊗ 18650 Li-ion rechargeable battery is not civil battery, use the 18650 rechargeable battery with protection circuit, or the battery may have the danger to burn or explode.

⊗ Please don't disassemble the sealed head, doing so can cause damage to the flashlight and will void the warranty.

⊗ Please use batteries of high quality, if the flashlight is not to be used for an extended period, remove the batteries, or the flashlight could be damaged by electrolyte leakage or battery explosion.

⊗ Please replace the O-ring if they are damaged after using for a long time and regularly lubricate the o-rings as to not erode the rubber. Doing so will keep the flashlight properly sealed against water.

⊗ Please clean the contacts of your light from time to time, especially if the light flickers or doesn't light up. There may be several reasons for a flickering or not working light:

Reason A: The battery needs replacing.

Solution: Replace batteries (Please confirm the correct installation of anode and cathode).

Reason B: The threads, PCB board contact or other contacts are dirty.

Solution: Clean the contact points with an alcohol soaked cotton swab.

If the above methods don't work, please contact the distributors and refer to the warranty policy.

Product Warranty

We will replace products afflicted with manufacturing defects within 15 days of purchase and repair a light free of charge within 24 months of purchase if problems develop with normal use; if repair is required after 24 months from the date of purchase, we will charge for parts. The total repair fee is dictated by the cost of the replaced materials.

Warranty Card Registration

We kindly suggest that you register your guarantee card on the official website for Fenixlight Limited. You can get an extra six-month warranty period once you have successfully registered. What's more, you could take part in the lottery of questionnaire at the same time.

Warning

The TK11 is a high-intensity lighting device and capable of causing eye damage, please avoid shining the light directly into the eyes.

TK11
Max 285 Lumens
