

Biometric Screenings go digital with Global

Global Health Solutions has the technology!

We are pleased to offer you the option of secure digital data collection and transmission at our onsite biometric screening events.

Digital data collection in 5 simple steps!

- 1** Our health professionals sign in to the secure Global Health Solutions Gateway to Wellness software using the tablet and Wi-Fi onsite.
- 2** Each participant is checked in on the tablet using our registration system at which point they complete a digital consent.
- 3** Our health professionals input the biometric screening results using the tablet for real time data.
- 4** Participant screening results are reviewed and teaching conducted. Our participant "Smart Report" can be emailed on the spot.
- 5** A participant survey is completed on the tablet upon completion of health screening.

Contact us today to learn more about bringing a Global Health screening clinic to your employees.

BENEFITS of tablet technology

- ✓ Data is encrypted at rest and in motion and that our technology meets the strictest privacy and security requirements.
- ✓ Instantly captures screening results, allowing for immediate personalized feedback for participants.
- ✓ Preventative measures can be implemented and risk factors reduced faster than ever before through our "teachable moments"
- ✓ With enhanced information flow, streamlined data collection and efficient scheduling, screening events run more smoothly and take less time away from employee productivity.
- ✓ Our program increases engagement all while providing reliable and real time data.
