Stakeholder Report Back: What we Heard
<April 13, 2016>

Project overview

<A short overview of the project and the planned outcome>

The Sunnyside sanitary lift station is located at 723 3st NW, across the street from the Calgary Curling Club. The new lift station will be constructed in the same location as the current building – sanitary service will continue for the neighborhood throughout the construction of the new station.

With the 2013 flood, sensitive equipment in the current lift station was badly damaged and required replacement. A study was undertaken in 2014 to assess the needs of the area and in 2015 preliminary design on the new lift station began. The preliminary design is nearing completion and we would like to get community input on the final design. Please see the FAQs for more information on the location, size, height and other items associated with this sanitary lift station.

Engagement overview

<A short overview of the engagement activities that this report back covers>

Stakeholders were engaged via online questionnaire that was available to them From April 1st to April 10th, 2016.

Stakeholders were asked to provide input on three choices of exterior (color and material) for the Lift Station, the stakeholders are not given the option of choosing which option they want but to comment as to what do they “like” and “do not like” about the options presented. Also, stakeholders were be asked about three fences available, they were be asked what they like and what they do not like about the fence options.

The options presented were not meant to be interchangeable, meaning it is not possible to combine options, station aspects, from option one and option two etc.

The project team will use input to make a decision on the exterior of the building and and fence that surrounds the building.

What we asked

The following are the material options and fence options with questions that were shown and asked from our stakeholders.

Material Options:

Wood: the unpainted wood slats bring some warmth to the building, contrasting with the grey sides and roof to give the structure a modern yet inviting look. This option features a blue perforated metal stairwell.

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard
<April 13, 2016>

- What do you like about this option?
- What do you not like about this option?

Shingles: The shingles bring a clean and modern look, with a bright feeling complemented by white sides and roof and a contrasting orange perforated metal staircase.

- What do you like about this option?
- What do you not like about this option?

Backlit perforated metal: Features perforated metal with backlit designs, complementing the natural vegetation in the area while providing some contrast. The silver metal is complemented by dark grey sides & roof with an orange perforated metal staircase.

- What do you like about this option?
- What do you not like about this option?

Fence Options:

Chain link: A woven fence made from black steel wire with the characteristic diamond pattern seen in this type of fence.

- What do you like about this option?
- What do you not like about this option?

This fence features sheets of perforated silver metal, less see-through than the other options with small round holes in the sheets of metal.

- What do you like about this option?
- What do you not like about this option?

Omega: This black wire fence features a rectangular pattern with reinforcing v-bends for strength and style.

- What do you like about this option?
- What do you not like about this option?

What is your postal code?

Stakeholder Report Back: What we Heard
<April 13, 2016>

What we heard

- ▶ For a detailed summary of the input that was provided, please see the [Summary of Input](#) section.
- ▶ For a verbatim listing of all the input that was provided, please see the [Verbatim Responses](#) section.

Next steps

- ▶ Who will see the input and what will they do with it?
 - The project manager saw the feedback and used it to help make a final decision on the choice for external materials and fence for final design of the sanitary lift station.
- ▶ Will more input be solicited?
 - No, the decision has been made as preferences were relatively clear based on community feedback.
- ▶ Was a decision made?
 - Yes, we will be constructing a sanitary lift station with the wood exterior and the Omega style fence.
- ▶ When will you communicate with stakeholders next?
 - We will communicate with people at the Flood open house on May 3, 2016 at Foothills Academy (745 37 Street N.W.). Handouts will be given to attendees with the decision on final materials, and those handouts will direct people to Calgary.ca/engage to see more details about the engagement process and why we decided on the materials we did.
 - We will include the final decision on materials used the day after the open house (May 4) on Calgary.ca page for the sanitary lift station. Again, people will be directed to the engage website to see feedback and how it was used to make final decisions.

Stakeholder Report Back: What we Heard
<April 13, 2016>

Summary of Input

Material Options:

Wood: the unpainted wood slats bring some warmth to the building, contrasting with the grey sides and roof to give the structure a modern yet inviting look. This option features a blue perforated metal stairwell.

What do you like about this option?

- Warm feeling/looks good
- Blends/compliments the community
- Natural material
- Modern/minimalist
- Contemporary

What do you not like about this option?

- Not fit neighbourhood (Sunnyside)
- Material(wood) wont last/maintenance issues
- Not unique/bland
- Nothing
- Staircase color

Shingles: The shingles bring a clean and modern look, with a bright feeling complemented by white sides and roof and a contrasting orange perforated metal staircase.

What do you like about this option?

- Unique look/colorful
- Orange staircase
- Shingles/shape
- Nothing/not much

What do you not like about this option?

- Dated look
- Shingle patters/multicolored pattern
- Material choice

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard
<April 13, 2016>

- Orange staircase
- Busy/distracting

Backlit perforated metal: Features perforated metal with backlit designs, complementing the natural vegetation in the area while providing some contrast. The silver metal is complemented by dark grey sides & roof with an orange perforated metal staircase.

What do you like about this option?

- Exterior design/color/backlit design
- Durable& maintenance free
- Timeless/modern/appropriate
- Neat concept/engaging design/imaginative
- Tree pattern
- Nothing/not much

What do you not like about this option?

- Plain look/not warm
- Perforated material
- Too modern/flashy/cold/industrial/
- Orange staircase (color)
- Light/backlight
- Does not fit neighbourhood

Fence Options:

Chain link: A woven fence made from black steel wire with the characteristic diamond pattern seen in this type of fence.

- What do you like about this option?
- Cheap and effective/low maintenance & visual impact/long lasting
- Suitable for neighbourhood/the norm/classic material
- Least obtrusive/visibility (through)
- Color
- Nothing

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard
<April 13, 2016>

What do you not like about this option?

- Appearance/bland
- Cheap option/traditional look
- Plain and ordinary
- Industrial look

This fence features sheets of perforated silver metal, less see-through than the other options with small round holes in the sheets of metal.

What do you like about this option?

- Unique/aesthetically pleasing/visually attractive
- Modern look/appearance

What do you not like about this option?

- Block the design (building)
- Design stands out/attract graffiti
- Industrial feel/institutional feel
- Wall effect/not friendly
- Expense/price associated

Omega: This black wire fence features a rectangular pattern with reinforcing v-bends for strength and style.

What do you like about this option?

- Allows for sight line/open see-through
- Clean lines/simple style/attractive/unique
- Functional/security
- Not much/nothing

What do you not like about this option?

- Institutional feel/prison
- Industrial feel
- nothing

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

Verbatim Comments

MATERIAL OPTIONS:

Option one:

Wood: The unpainted wood slats bring some warmth to the building, contrasting with the grey sides and roof to give the structure a modern yet inviting look. This option features a blue perforated metal stairwell.

Submitted Date		
	What do you like about this option?	What do you not like about this option?
4/10/2016 21:44	The wood looks warm, and the blue staircase is awesome!	Not as unique as the other two options.
4/10/2016 11:44	I feel that the wood slats will fit in well with Sunnyside, and give a warm feeling to the building. I also like the blue colour of the stairwell.	There is nothing I dislike about this option.
4/10/2016 8:26	Warm feeling fits well with community character. This is our vote.	Nothing, we like it. Maybe it'll start looking older faster than other options?
4/10/2016 7:52	The wood would compliment the old and new of Sunnyside. Whereas the other option do not seem to reflect the unique heritage of Sunnyside.	
4/9/2016 21:45	Preferred option. It seems to blend into the environment and has not as industrial looking as the other options. It also has cleaner more contemporary lines than other options.	Nothing
4/9/2016 11:27	I really like the warmth of the wood but I think that the metal one might be a better choice because . . .	I think that the durability
4/9/2016 11:22	Low profile, timeless, simple, durable, neutral	
4/9/2016 9:29	I think it would look the most like a house, and would blend in nicely with the neighbourhood. The design is clean and modern, without looking industrial.	I don't see any downsides.
4/9/2016 8:42	The wood paneling makes it fit into the area	N/A
4/7/2016	The natural material that will age nicely.	Nothing its great!

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

13:41		
4/7/2016 13:24	the natural look of wood	it's a bit bland but this would be my preferred option
4/7/2016 8:06	please stop wasting my tax dollars	please stop wasting my tax dollars. build the cheapest shed.
4/6/2016 23:43	The warmth of the wood, the blue staircase - some contrast, but not too distracting & overall pleasant look.	Not sure how well it fits in with the surrounding buildings/houses & neighbourhood.
4/6/2016 10:14	wood works well with the surrounding bluff	its nice but it could be more "sunnyside"
4/5/2016 20:49	The wood has a warm inviting feel and will hopefully blend into the neighbourhood with same feel as some of the newer contemporary style houses going up here.	
4/5/2016 19:48	Love the Blue perforated metal case!	The wood. I think it will either look plastic or need matinance. I do not like it.
4/5/2016 19:43	It's modern and minimalist - looks great	Nothing
4/5/2016 15:18	Probably least intrusive.	Not impressed with design in general.
4/5/2016 13:35	The warmth of the wood, good contrast with metal	I like this option
4/5/2016 13:35	I prefer this option over the others - I like the wood	
4/5/2016 13:33	Don't like it. Will result in more maint over time	Wood will eventually become worn and old looking. will need more maintenance over time.
4/5/2016 13:32	It looks warm and modern	
4/5/2016 12:33	Most natural	The wood will need repeated re-staining
4/5/2016 10:28	Simple. I like the use of color in the staircase	The unpainted wood will weather quickly
4/5/2016 9:29	Modern shape, wood is natural/earthy to match well with the bluff. Blue, grey and wood nice colour combination.	Wood may weather poorly over time.
4/5/2016 9:01		I don't like this option because of the way that wood weathers over the years and doesn't look as good eventually.
4/5/2016 8:19	Blending in to the sroundings	May not last long?

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/4/2016 21:58	The vertical wood looks nice. Doors/vents appear well concealed.	Not sure how the wood will actually look in real life (doubt it will look as warm and even as the rendering), not sure how good it will look with age.
4/4/2016 21:39	The wood will blend better with the neighbourhood. This is already a much bigger building than before.	The building is a bit square. Close architecture to the house next door, but not very Sunnyside.
4/4/2016 21:21	Natural materials. Neutral colours.	
4/4/2016 20:38	warmth, natural, modern	
4/4/2016 19:53	The wood is a contemporary and timeless look.	If wood not treated properly it could age poorly.
4/4/2016 19:44	The wood exterior looks good, helps to blend it in with the mixed-character neighboring buildings.	Looks pretty industrial. Possible to put windows or something in to make it look less monolithic and foreboding?
4/4/2016 19:23	Easily the most attractive.	The shade of blue colouring on the perforated metal staircase.
4/4/2016 18:33	I prefer this option.	
4/4/2016 16:30	Nothing. Sorry.	I am not a fan of these wood slats. I know they are trendy right now, but when the trend dies in a few years we will be stuck with these dated looking structures all over the city. Bad idea.
4/4/2016 9:52	I like the look of wood -- warm	I don't think it fits with the buildings on either side -- unfortunately.

Option two:

Shingles: The shingles bring a clean and modern look, with a bright feeling complemented by white sides and roof and a contrasting orange perforated metal staircase.

Submitted Date		
	What do you like about this option?	What do you not like about this option?
4/10/2016 21:44	Very unique, just like Sunnyside!	Would look dated within a few years.
4/10/2016 11:46	I like the orange metal staircase.	I find the pattern of the shingles to be really unsightly. I don't like the mix of colours at all. I don't think this will fit in with Sunnyside.

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/10/2016 8:26		not crazy about the multicoloured shingles look.
4/10/2016 7:55		Orange staircase seems to be a bit extreme and would not blend with the community.
4/9/2016 21:44	Second choice option	It appears to look a bit busier and might look a lot
4/9/2016 11:31	not much	don't like the colours
4/9/2016 11:22		Higher visibility, likely to "date" more quickly than other ootione
4/9/2016 9:32	I don't really understand the shingle colour...are they actually greys and peach-burgundy shades? Don't like the white sides, too bright.	I think the shingles look a bit mottled, not in a pleasing way, according to the online rendering. How would you maintain the colour over the years? Is the burgundy really burgundy (looks like it on my monitor.) Red is notorious for fading in sunlight.
4/9/2016 8:44	Nothing	Very gaudy
4/7/2016 13:41	Nothing.	It will look dirty as it ages. Not a great material choice.
4/7/2016 13:25	it is colourful	too garish
4/7/2016 8:07	please stop wasting mt tax dollars. build the cheapest shed.	why are there no prices listed for these? build the cheapest one.
4/6/2016 23:43	Unique look. The bright look of the white roof & sides.	Uncertain about the shingles, the overall colouring & think it might be too modern for the neighbourhood. This is my least favourite option.
4/6/2016 10:15	colourful, very sunnyside-esk!	nothing, i think its great
4/5/2016 20:49		I'm not sure how well this option will weather and don't feel that it will blend in very well
4/5/2016 19:49	Love the shingles, would be nice if they were real bright colors, a white roof makes sence to reflect heat.	Would prefer blue perforated metal
4/5/2016 19:43	I don't like it	It's way too 'busy' and distracting - doesn't look good
4/5/2016 15:18		Least attractive of the three.
4/5/2016 13:36		Design is too busy, colours are institutional

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/5/2016 13:35		not keen in this one
4/5/2016 13:33	nothing	the look of it
4/5/2016 13:33		white sides and orange staircase
4/5/2016 12:33		Odd colours
4/5/2016 10:29	The design is unique and interesting. Good use of color	
4/5/2016 9:28	Shingles are unique and should weather well.	Does orange match with pastels visualized?
4/4/2016 21:57	The diamond shapes of the shingles	Don't like the colours of the shingles. Don't like that there appears to be an extra vent visible on the 2nd level (as compared to the wood / metal options)
4/4/2016 21:21		Too bright. Doesn't complement the neighbourhood.
4/4/2016 20:38		lovely urban camo motif... awful.
4/4/2016 19:54	Like the bright colour of the staircase.	A lot hinges on shingle design picked, rendering may not show final product well.
4/4/2016 19:45	Not much	Hodge-podge colour scheme is really unattractive. Not suitable for a public building in a residential area.
4/4/2016 19:24		Not attractive at all.
4/4/2016 16:31	I like the orange staircase. This would be a bright and funky looking structure.	There is something weird and busy about the shingles. It could be cool, but then again, it could also be a disaster.
4/4/2016 9:52	Not much	This will not fit well with any of the building around.

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard
<April 13, 2016>

Option three:

Backlit perforated metal: Features perforated metal with backlit designs, complementing the natural vegetation in the area while providing some contrast. The silver metal is complemented by dark grey sides & roof with an orange perforated metal staircase.

Submitted Date		
	What do you like about this option?	What do you not like about this option?
4/10/2016 21:44	Tree pattern	Having lights running all the time, not as warm as the other designs.
4/10/2016 11:47	I like the dark gray of the sides and roof, and the orange staircase.	I don't like the perforated metal, it looks strange, and I don't think it will fit in with Sunnyside. I do prefer it over the shingles, though.
4/10/2016 8:26	cool design	not sure it fits Sunnyside
4/10/2016 7:56		Too modern and flashy. Not representative of the diverse heritage of Sunnyside. The dark sides mixed with the metal would look daunting and institutional.
4/9/2016 11:29	I like this one but am having a hard time visualizing it--the metal does not show well on computer screen; it's probably durable and maintenance free	Orange staircase? huh?
4/9/2016 11:23	Low visibility, modern but still relatively timeless, simple	Orange stairs
4/9/2016 9:35	Cool idea if it were a stand-alone building. According to the picture, it's right next to a house. This would be a better option if it had more space around it, and could be seen by more people.	Doesn't seem like a good choice for the middle of a residential block. Backlit designs could be annoying to direct neighbours. Metal face could reflect sun badly.
4/9/2016 8:45	Nothing	Very cold modern look
4/7/2016 13:41	Neat concept, but not best materials.	Will not age well, will look tacky.
4/7/2016 13:26	not much	too industrial
4/7/2016 8:08	waste of tax payer money. build the cheapest shed stop trying to make it into "art"	I don't like that it looks like its a waste of my tax dollars. build a cheap shed.

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/6/2016 23:43	This is my favourite of the three - it's interesting without too much contrast & the backlit designs look lovely and complement the neighbourhood. Engaging design.	
4/6/2016 11:36	Looks appropriate for the type of building, separates it from the look of a house	
4/6/2016 10:15	blends in such that it isn't really noticed	plain (sunnyside is vibrant, so it stand to reason that if you can be vibrant, be vibrant!)
4/5/2016 20:49		This one is just too cold and business like for the neighbourhood
4/5/2016 19:50		Would prefer blue perforated metal, feel the rest is too black and white.
4/5/2016 19:43	It's the best one! Modern and interesting - will blend in and stand out at the same time!	Nothing
4/5/2016 15:18	Imaginative.	Don't think it fits with neighbourhood ambience.
4/5/2016 13:36		Too stark for the surroundings
4/5/2016 13:35		or this one
4/5/2016 13:33		worried about light reflection. Not as interesting as the others
4/5/2016 13:33	Modern look and pleasing to the eye	Like it all
4/5/2016 12:33		will reflect too much
4/5/2016 10:30	Backlit design	
4/5/2016 9:28	Perforated metal is very unique! Really like the backlit design!	Nothing, great option!
4/5/2016 9:02	This is my favourite option both because of the durability of metal and because of the way it looks.	
4/4/2016 21:57	Tree design on the metal is nice. Doors/vents appear well concealed.	A bit cold/industrial looking.
4/4/2016 20:40		prison or power station

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/4/2016 19:55	The perforated metal and its design could look stunning, much like the Parkades featuring the same material at SAIT.	Design on the perforation is key, needs to be subtle yet effective.
4/4/2016 19:46	Backlighting should create a nice, airy feel.	Not much, this is my preferred choice.
4/4/2016 19:25	A decent second to the Wood option, in terms of appearance.	Orange is an odd colour for the staircase.
4/4/2016 17:42		too shiny
4/4/2016 16:32	This is by far my favourite design! I like everything about it - the orange staircase, the dark grey sides and roof, and especially the metal walls. This would be a very eye-catching and interesting looking structure. Exciting!	Not a thing. When I scrolled down and saw this one I thought: "Ah, yes!"
4/4/2016 9:53	This looks like it will fit best with the surrounding buildings	I think the light grey may look awful when it gets dirty from the automobile traffic nearby.

FENCE OPTIONS:

Chain link: A woven fence made from black steel wire with the characteristic diamond pattern seen in this type of fence.

Submitted Date		
	What do you like about this option?	What do you not like about this option?
4/10/2016 21:44	Cheap & effective	Not very exciting too look at
4/10/2016 11:49	I think this type of fencing is normal and suitable for the neighbourhood.	With its low upkeep, I think this is an excellent fence. I don't seen any problems with it.
4/10/2016 8:26	straight up old school fence	straight up old school fence
4/10/2016 7:58		Boring and cheap-looking.
4/9/2016 11:29	colour	boring and traditional
4/9/2016 11:24	Basic, low maintenance, low visual impact	

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/9/2016 9:36	Cheap.	Boring.
4/9/2016 8:48	the norm	
4/7/2016 13:41	It is a classic material choice.	It's overdone.
4/7/2016 13:27	it's the least obtrusive design	very ordinary
4/6/2016 10:15	it would allow people to see the station especially if its vibrant and colourful	plain
4/5/2016 20:51	This is my preferred option, it's the least intrusive and easy to see what's on the other side	
4/5/2016 19:44		It's ugly
4/5/2016 15:18	OK.	Not very imaginative.
4/5/2016 13:36		Bland, common
4/5/2016 13:34	openness	typical-ness
4/5/2016 13:33	nothing	too low rent looking / ugly
4/5/2016 10:37	Most likely cost effective. Can see through to the unique building.	
4/5/2016 10:30	Simple. Cheap	Boring
4/5/2016 9:04	my preference for a fence would be the option that is the most cost effective to perform it's function. thanks.	
4/4/2016 21:57	Unobtrusive, appears to be lower than the other 2 options.	Looks low-budget. If there will be a lot of equipment/junk stored behind the fence, it will be very visible.
4/4/2016 21:22		Too industrial.
4/4/2016 20:40		school ground
4/4/2016 19:56	Simple, allows good visibility on both sides.	Typical fencing seen everywhere.
4/4/2016 19:43	Nothing	Looks cheap
4/4/2016 19:26	Simple design and appearance.	Looks cheap.
4/4/2016 16:32	It would keep the pit-bulls out!	It's very basic and cheap looking.

<Sunnyside Lift Station >

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/4/2016 9:55	Usually these fences last a long time.	It's pretty ugly.
---------------	--	-------------------

This fence features sheets of perforated silver metal, less see-through than the other options with small round holes in the sheets of metal.

Submitted Date		
	What do you like about this option?	What do you not like about this option?
4/10/2016 21:45	Unique	Would block more of the interesting design of the new lift station than the others
4/10/2016 11:50	This is an aesthetically pleasing fence, and a kind not seen before in Sunnyside. I would make this my second choice.	This fencing is less "friendly-looking" than regular chain link, and would stand out in Sunnyside. Might attract graffiti?
4/10/2016 8:26		Will probably be covered in graffiti for most of its life.
4/10/2016 7:57		Seems to be a bit heavy duty for the job. Very institutional and not cohesive with the community!
4/9/2016 21:47	Clean lines. Preferred option	
4/9/2016 11:29	COLOUR	opacity: why bother creating a spiffy building (lift station) if it can't be seen
4/9/2016 11:24		Imposing, industrial feel
4/9/2016 9:37	Visually attractive.	Invitation for graffiti. As the person responsible for the message board about a block away, I can tell you there are taggers in this area.
4/9/2016 8:48	sleek looking	
4/7/2016 13:41	It seems safer.	Might be too much of a "wall" visually.
4/7/2016 13:27	nothing	looks very forbidding
4/7/2016 8:10	I don't like the fact that it looks like it would cost 8 times what a normal fence would.	why are there no price estimates for these fences?
4/6/2016 10:16	nice fence to look at	if the shingles are chosen for example, it would hide it and cost more to see less

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/5/2016 20:50		These is my least favourite option because of how solid it is - in effect, it will feel like a wall
4/5/2016 19:51	Love this option!	
4/5/2016 19:44		It's too much!
4/5/2016 15:18		Doesn't let light through.
4/5/2016 13:37	Clean looking, striking, good combo with wood version of building	
4/5/2016 13:34	modern looking	not as see-through -- worry about safety
4/5/2016 13:33	Modern look and pleasing to the eye.	Like it all
4/5/2016 12:34	screening	
4/5/2016 10:38	Unique.	Most likely more expensive.
4/5/2016 10:31	Simple clean design	More expensive?
4/5/2016 9:05		i like the more open, see-through options
4/4/2016 21:57	Might do the best job of hiding ugly equipment kept inside. OK if it's set back far from the sidewalk.	Looks somewhat cold/industrial. Would seem unfriendly if it was very close to the public sidewalk.
4/4/2016 21:22	Nice. Matches the perforated stairs.	
4/4/2016 20:40	cool, modern	
4/4/2016 19:57	Very modern, would attract attention.	If perforations don't allow much visibility you could block the view of the new building.
4/4/2016 19:47	It's not chain link. Looks nice, relatively sophisticated, not too industrial. Suitable for residential area.	Not sure of height of fence but if it is over 5.5 feet, could be somewhat foreboding.
4/4/2016 19:26	May be a more modern appearance.	Tough to tell the details based on the small size of the picture.
4/4/2016 18:34		This is my least preferred option. I like the openness of the first and third options.

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/4/2016 16:33	I like its modern/industrial look. I think it would look good in a sleek restaurant.	I don't think this fence would stand the test of time. I could see it covered in "tags" or graffiti, with gum and other gunk along the bottom ridge.
4/4/2016 9:55	It obscures more of the building	Not much. It seems OK.

Omega: This black wire fence features a rectangular pattern with reinforcing v-bends for strength and style.

Submitted Date		
	What do you like about this option?	What do you not like about this option?
4/10/2016 21:46	Looks nicer than the chain link fence, still allows a sight line to the new lift station	
4/10/2016 11:51	I like the clean lines of this fence, but I prefer the regular chain link above the other choices.	Looks institutional.
4/10/2016 8:27	A bit of a designed look to it, still very simple.	
4/10/2016 7:58	Nice style. Simple yet not a typical chain link. A bit more classy look.	
4/9/2016 11:31	I like its shapes but wonder about its matching my choice of building: the metal one. Maybe the metal fence would match better	nothing
4/9/2016 11:25		Looks institutional, imposing
4/9/2016 9:43	This is a little more interesting than plain chain link.	It's fine, if a bit boring. I like the chain link downtown that looks like lace. (Just south of the Bow building on Centre St, I think)
4/9/2016 8:46		Prison looking
4/7/2016 13:41	Open see-through approach	Nothing!
4/7/2016 13:28	not much	too industrial
4/7/2016 8:12	it looks like it would be less of a waste of my tax dollars then the other more expensive looking fence	I don't have a clue what it costs because you have not given prices.

Stakeholder Report Back: What we Heard

<April 13, 2016>

4/6/2016 23:48	A nice balance between the other two options - somewhat translucent, somewhat opaque & functional without being too utilitarian.	
4/6/2016 11:35	It is the most attractive.	
4/6/2016 10:17	its a nice alternative to the chain link, and would allow us to see the exterior of the lift station	nothing, its a good option
4/5/2016 20:50		This option feels like a high security fence and a little jail-like
4/5/2016 19:45	If there HAS to be a fence, I'd go with this one.	
4/5/2016 15:18	Lets light through. More attractive than chain link.	
4/5/2016 13:38	More uncommon version that allows for visibilty of building	
4/5/2016 13:34	visibility	very security-looking. Not as nice.
4/5/2016 13:33	nothing	ugly
4/5/2016 10:38	More unique than diamond.	nothing.
4/5/2016 10:31		looks like a prison
4/4/2016 21:57	Least offensive of all the choices. Somewhat different - not a design you see everywhere.	If there will be a lot of equipment/junk stored behind the fence, it will be very visible.
4/4/2016 21:23	Better than chain link option.	Might be too tall?
4/4/2016 20:40		prison
4/4/2016 19:58	A modern take on the wire fence.	Nothing.
4/4/2016 19:47	Not much	Too industrial
4/4/2016 19:27		This looks terrible, and has a prison/jail appearance to it.
4/4/2016 16:34	I think this option is the best. I prefer the see-through fences, and this one is much more attractive than the chain-link. It looks like it would be harder to climb, providing better security.	It does sort of look like something you might see around a prison yard, minus the barbed-wire at the top!

Stakeholder Report Back: What we Heard
<April 13, 2016>

4/4/2016 9:55	I like that one can see through the fence --gives an open feeling	It looks like a prison fence.
