## Bat Boxes in Greenway Park

### IDEA SUMMARY

Installing bat boxes in parks, especially where there are large populations of mosquitoes.

### COST SUMMARY

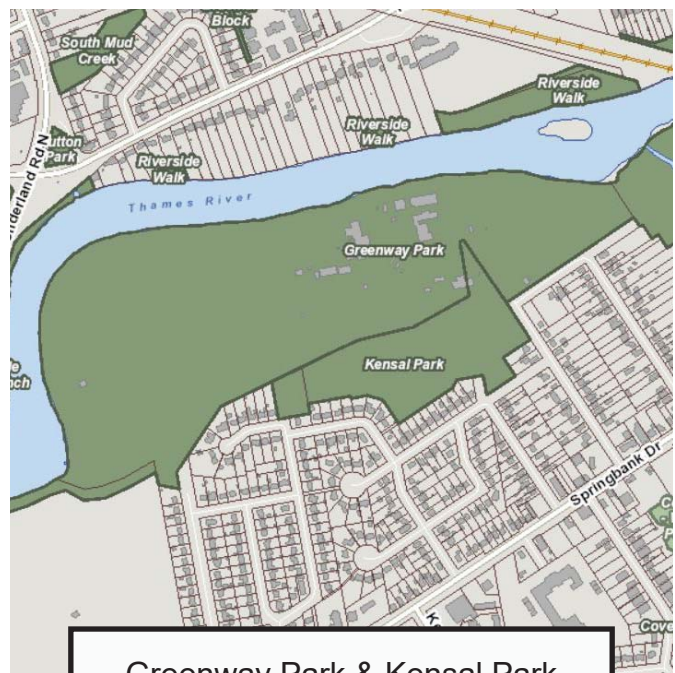

**Total Cost = \$600**

**Cost Breakdown:**

Bat Boxes (4) - \$200; Poles - \$200;  
Installation - \$200; Total \$600

### COMMUNITY IMPACT

Bat boxes would increase the bat population in the area, which would help to naturally control the mosquito population in Kensal Park. Neighbours cannot use their backyards in the summer without getting several mosquito bites or spraying themselves down with heavy doses of mosquito repellent. Because of our proximity to the river and the treatment plant, there is a lot of water for mosquitoes to breed. We often see swarms of them every night in and around the area.

## Solar Panels at Civic Gardens

### IDEA SUMMARY

Install a set of solar panels on a city roof, or in a park for all to see. This will benefit the environment by pushing renewable energy forward, while showcasing the current technology behind solar panels.

### COST SUMMARY

**Total Cost = \$30,000**

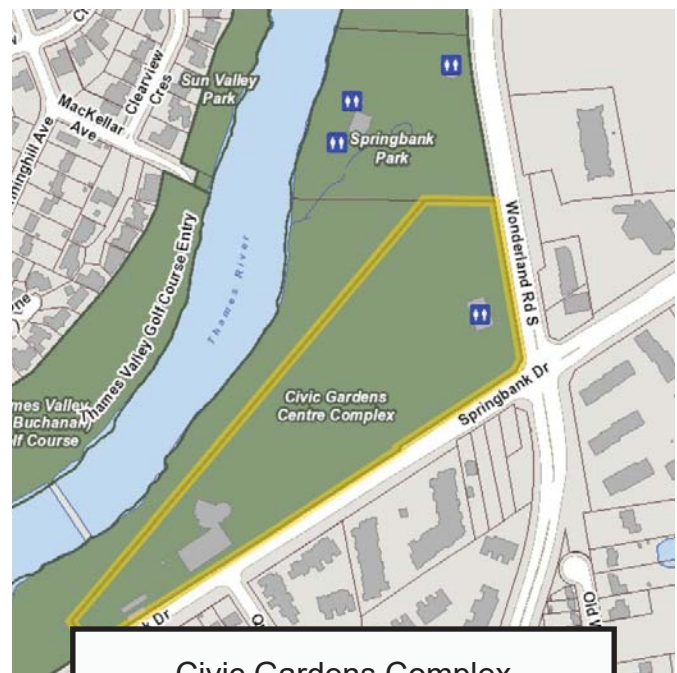

**Cost Breakdown:**

Installation of Solar Array - \$30,000

### COMMUNITY IMPACT

Progressive action on renewable energies will help push for more renewable energy options, helping give us a fighting chance to combat climate change. It will help make the globe a better place, one neighbourhood at a time.

## Frisbee Golf in Ashley Oaks Park

### IDEA SUMMARY

We are proposing to add 3 frisbee golf nets in the open field areas of Ashley Oaks Park.

### COST SUMMARY

**Total Cost = \$1,800**

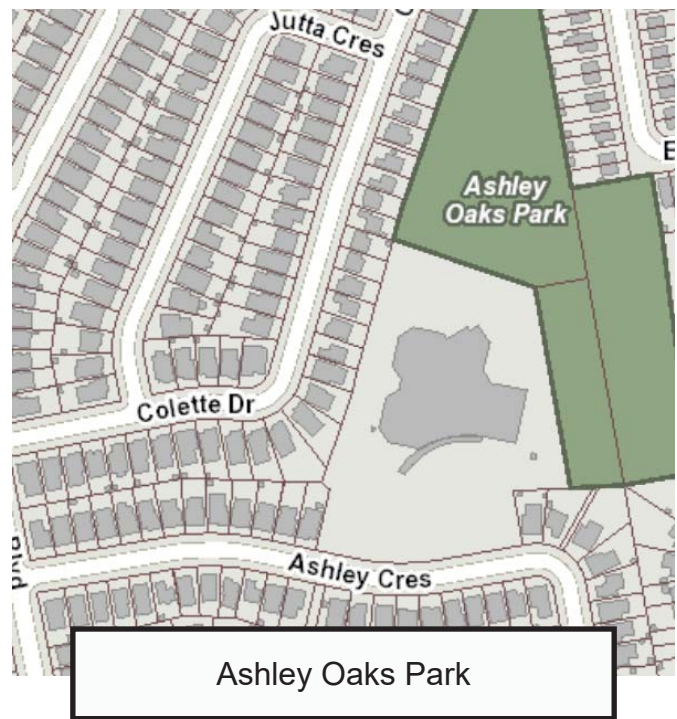

**Cost Breakdown:**

3 Frisbee Golf Nets - \$1,800

### COMMUNITY IMPACT

People will be able to spend more time being active outdoors. You can have more fun outside. It would allow people time to practice for free.
