

Basketball Court Upgrades at Northbrae Public School

IDEA SUMMARY

Upgrades to the basketball nets, backboards, and posts to existing playground area.

COST SUMMARY

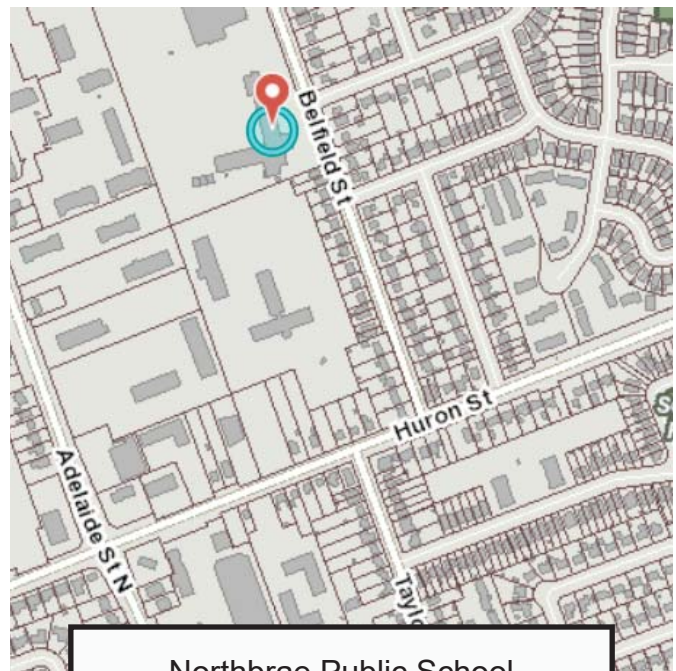

Total Cost = \$30,000

Cost Breakdown:

Equipment and labour - \$30,000

COMMUNITY IMPACT

An upgraded basketball court will promote and support daily physical activity and provide increased opportunity for social awareness and community engagement for children, youth and neighbourhood families. This is an accessible place for many families living in apartment buildings and homes that surround our space. We are most eager for the community to have basketball courts that youth and family members can access anytime, particularly evenings and weekends. Our idea will build community connections and promote fair play, fun and great friendships that can be fostered and sustained in our Northbrae community.

Skating Rink at Dalkeith Park

IDEA SUMMARY

Looking to implement a neighbourhood supported ice rink in Dalkeith Park.

COST SUMMARY

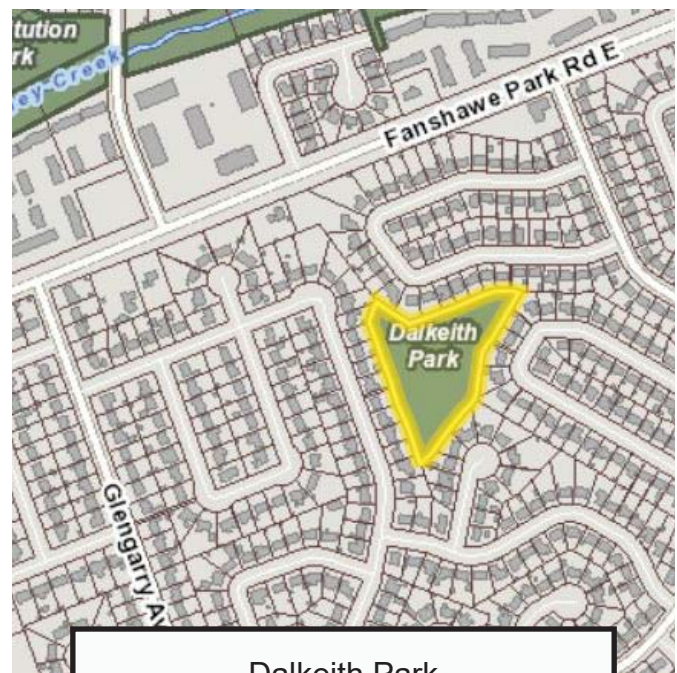

Total Cost = \$2,500

Cost Breakdown:

Supplies to build neighbourhood rink -
\$2,500

COMMUNITY IMPACT

During the winter months, neighbours often are indoors and don't come together to connect, having a skating rink in our neighbourhood will allow families to come together. We would like to include lighting into our budget because of the time of year, it will be nice to have usage during the evenings.

Barn Swallow Nesting Structure in Stoney Creek Watershed

IDEA SUMMARY

A barn swallow nesting structure to allow a place for barn swallows to safely nest and raise their young.

COST SUMMARY

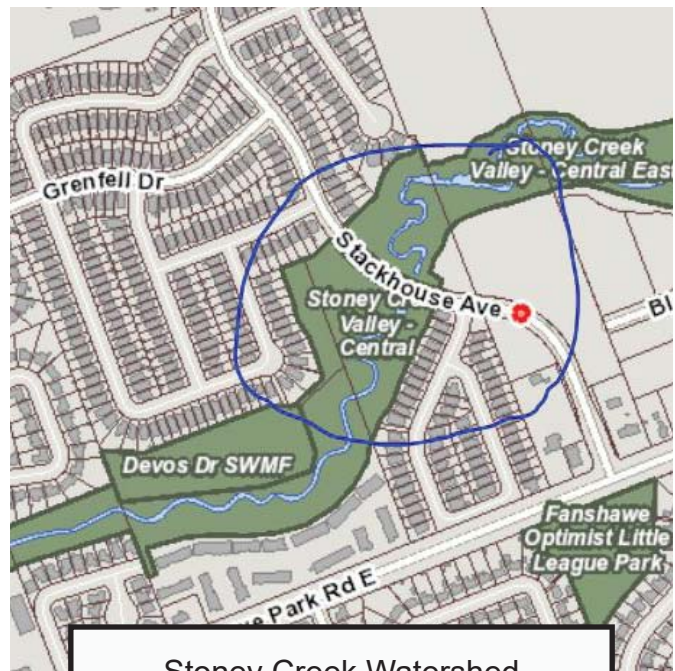

Total Cost = \$10,000

Cost Breakdown:

Building supplies and installation - \$10,000

COMMUNITY IMPACT

With the loss of nesting habitats, a barn swallow nesting structure could encourage barn swallows to start building nests (colonies) in a sheltered and safe location. This artificial nest site would support an endangered bird species and control mosquito population in the residential areas along the watershed area.
