Creating a Community of Practice: The Journey from Research to Application Fostering Well-Being

The goal of this presentation is to first inform you about the process and value of meaningful student/teacher relationships, while subsequently allowing you to experience what it feels like to create, and be a member of a supportive group.

To that end, before attending the workshop, please take a few minutes to answer the following questions. This is informal. I would simply like to ask you to share an experience to give your group a starting point.

I have taken these questions from the ones I asked teacher participants during the interviews for my research.

- 1. How long have you been teaching (or holding another position) at your school?***
- 2. What is your position/department?***
- 3. Can you give me an example of what you would say was a meaningful interaction between you and a student who was struggling?***
- 4. Can you describe the interaction?***
- 5. What was the outcome?***
- 6. What was the impact of the interaction on you?***
- 7. How do you think you impacted on the student?***

You can bring your responses in any format; hard copy or digital.
