OUR POLICY

When you contract with BR Crack Filling & Painting Services, you will be provided an estimate and timeline of the requested services. We will discuss your needs and requirements before the job begins.

We Keep Clean...

We understand that these services can get messy and make every effort to control our supplies and keep the work area as clean and organized as possible.

We carry the best equipment to manage supply and paint organization to prevent paint spilling or drips: including plastic wrapping, can holders...etc.

We ensure that all equipment and other supplies are contained and cleaned at days end, as well as easy to set up the beginning of the next day.

We provide pressure washing and extensive cleaning before and after the job.

We Use Only The Best...

We realize that not all paints are the same and purchase the best quality paints. Here are the main brands that we use:

- * Benjamin Moore Paints
- * Behr Paints
- * CIL Paints

We repair areas prior to painting which includes a coat of primer. We apply at least two coats of paint, we add more depending on the colour or the contract.

We get our flooring and roofing products from credible providers in New Brunswick as we like to stay local.

We Inspect Our Work...

When the job is complete, our contractors take inventory of their equipment to ensure nothing is left behind.

Everything will be picked up, thrown out, and wiped down.

We guarantee most of our work for 2 years after job completion including: exterior paint, roofing and exterior crack filling.

If you are unsatisfied with the work or find any faulty workmanship we will return within two business days to correct the job. We will continue to work on it until it reaches your satisfaction.

Thank you for considering BR Crack Filling & Painting Services for your next project!
