I'm unable to add a hyperlink to the text directly. If you're publishing this text on a website or platform that allows HTML editing, you can add the hyperlink using the following steps: 1. Identify the topic-related keywords where you want to place the hyperlink, such as "Registered Congenital Cardiac Sonographer (RCCS)" or "Pediatric Echocardiography Registry Exam." 2. Surround the keyword with the tag with the href attribute pointing to the provided URL. For example, to link the keyword "Registered Congenital Cardiac Sonographer (RCCS)" to the URL "https://www.certkillers.net/Exam/CR007", you can use the following HTML code: [Registered Congenital Cardiac Sonographer (RCCS)](https://www.certkillers.net/Exam/CR007). 3. Repeat the same process for the second instance of the keyword in the text. If you have any specific keyword or section where you would like the hyperlink to be added, please let me know, and I can provide you with the HTML code.
